IT'S THAT EASY
TO OPTIMISE
YOUR PRODUCTIVITY!

THERE ARE MORE IMPORTANT MATTERS TO TAKE CARE OF THAN WAITING FOR PRINTOUTS OR SEARCHING FOR PRINT DATA. TAKE ADVANTAGE OF A MULTIFUNCTIONAL SYSTEM THAT TAKES WORK OFF YOUR HANDS AND SAVES YOU MORE TIME.

The new 2550ci is perfect for users who would rather look after more important things.

The HyPAS interface optimises and simplifies your specific processes. It allows you to create searchable files by using Scan2OCR*. Your benefit: Never again will you have to retype original documents or spend hours searching for documents.

And waiting is also a thing of the past! Use the Follow-Me-Printing solution* and simply call up your printouts on another system with your ID card.

Your private material is as secure as it should be: The 'private print' function ensures that only you can print it after entering a code.

If you often have to print out the same documents, just use the document box on the system's hard disk. Your print data is there in processed form so that you can print large image files without delay.

It's also just as quick and simple in colour. You can use the 2550ci to create attractive colour documents with a high quality image almost at the push of a button in order to make your documents more eye-catching and not waste any time.

Controlling the 2550ci is easy thanks to the option to install a card reader system* that allows users to automatically authenticate themselves on the system.

This is doubly efficient: Firstly, administrative work for controlling is now no longer necessary and, secondly, only authorised users can print in colour.
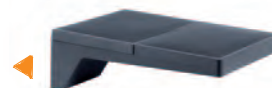

Deadlines, particularly in projects, frequently cause time pressure. No problem! After the immediate output of the first page, the printer delivers 25 A4 pages per minute, both in colour or black and white. Duplex productivity of 90 % for A4 ensures your documents are completed in a timely manner.

Flexible paper management

High security

Intuitive operation

WHAT IT'LL DO FOR YOU:

- Generous standard features: Copying, printing, (colour) scanning and optional faxing.

- Completely user-friendly: The large colour panel is logically laid out.

- Faster with program buttons: Simplify the creation of routine jobs.

- Faster scanning: The original feeder processes 50 sheets. Colour and b/w documents are automatically recognised when being copied.

- Job separator: Copies and printouts can also be sorted into different trays. This ensures your documents do not get mixed up.

- Increasing quality, reducing costs: Processes paper weights of up to 256 g/m². This allows you to produce attractive presentations in-house with ease.

- The optional finisher staples your documents of up to 50 sheets for easy distribution.
